 Call "811" before you begin any digging project.

#### NOTICE

All projects shall be designed in accordance with the City of Sweetwater Public works Specifications, Miami Dade County Public Works Manual and the FDOT Standards manual. All work requires a permit unless specifically exempted by this department. A permit becomes null and void if work or construction is not commenced within **180-days**, or is suspended or abandoned for a period of **180-days** unless advised otherwise by the Public Works Director or his designee. Request inspections a minimum of 1 business day prior to inspection

Public Works Construction Permit for proposed work identified and described above and according to the approved specifications and drawings and the attached stipulations, is hereby approved and granted to the above contractor, subject to the permit and/or approval of the project, drawings and/or specifications required by any Local, County State and/or Federal Agency.

I hereby certify that I have read and examined this application and know the same to be true and correct. All provisions of laws and ordinances governing this type of work will be complied with whether specified herein or not. The granting of a permit does not presume to give authority to violate or cancel the provisions of any other state or local law regulating construction or the performances of construction.

#### DRAINAGE ONLY

An engineer registered in the State of Florida should prepare all plans, specifications and calculations of the proposed work. Said plans and calculations shall be subject to the review and approval of the Department of environmental Resources Management. The permit applicant will secure the services of an engineer registered in the State of Florida to conduct inspections throughout the construction period, and said engineer shall prepare all required drawings of record.

If road closure, an approved M.O.T. must be submitted along with permit application.

All construction activities are to use best management procedures to prevent sediments from entering adjacent property, stormwater inlets, water bodies, or other areas which may eventually cause them to be washed into adjacent surface water bodies.
